CAREER OBJECTIVE

Results-driven and detail-oriented Front-end Software Developer with 2 years of experience specializing in e-commerce store development for renowned brands. Proven ability to collaborate with clients and deliver tailored solutions that meet their exact standards. Skilled in user interface development using Angular, React, and other frameworks, with proficiency in HTML, JavaScript, CSS, and related technologies. Seeking a challenging role as a Front-end Software Developer to contribute to the design, development, and integration of cutting-edge applications within a collaborative and dynamic team environment.

WORK EXPERIENCE

Front End Developer

Red Van Workshop

📅 Jan 2022 - May 2023

- Developed and implemented custom e-commerce stores for leading brands, adhering to client specifications and standards.
- Contributed to the design and development of scalable frameworks and tooling to improve developer experiences and productivity.
- Utilized HTML, CSS, JavaScript, and React to create user-friendly interfaces and optimize performance.
- Worked with cross-functional teams, including product owners and designers, to ensure effective collaboration and delivery of high-quality solutions.

Software Development Intern

Red Van Workshop

📅 May 2021 - Aug 2021

- Thrived in a fast-paced software development environment, regularly adapting to new technologies, tools, and methodologies to enhance productivity and stay up to date with industry advancements.
- Utilized Agile development methodology and project planning through JIRA, and Confluence. Used Github for code reviews and pushing code from the sandbox to staging, production and onto development.
- Built within Salesforce Commerce Cloud ecosystem, using business manager. Developed with the existing Red Van Workshop out of the box software.

PROJECTS

Mathis Brothers Website

- <https://www.mathishome.com/mathis-home>
- As part of a dynamic team, I played a key role in building various custom front-end applications that enhanced the functionality and user experience across the entire site. My responsibilities encompassed designing and implementing interactive features, optimizing performance, and ensuring seamless integration with back-end systems.
